Work Experience

TIETO

Skelleftea, Sweden

Software Developer

07/2023 - Present

- Full-stack development for Ericsson's Cloud RAN and Private 5G projects using Golang, Python, and React.js.
- Implemented a real-time alarm monitoring system for Private 5G power racks, providing immediate user notifications for critical baseband issues like power outages and temperature anomalies.
- Built scalable microservices and RESTful APIs, improving backend performance by 30% and enabling modular service integration.
- Automated network configuration with NETCONF, reducing manual effort by 50% and increasing reliability.
- Deployed and optimized RAN systems with Kubernetes, Helm, and cloud-native tools, enhancing deployment success rate by 40%.
- Maintained 95%+ unit test coverage for backend components, significantly reducing production bugs.

Bobbi Health(USA based startup)

Remote

Software Developer

10/2021 - 08/2022

- Implemented robust Single Sign-On (SSO) and unified user authentication across multiple providers, enhancing security and user experience.
- Developed and deployed a RAG-based conversational AI chatbot on Hugging Face, utilizing LLMs to provide intelligent answers derived from pregnancy-related PDF documents.
- Integrated unit and integration testing into CI/CD workflows, significantly improving code quality and system stability.
- Engineered a health alert system with Celery and Redis using a sliding window algorithm for physiological data analysis.
- Managed database schema evolution and migrations using SQLAlchemy, ensuring data integrity and application compatibility.
- Designed and implemented a PDF-based health report generation module, providing users with comprehensive summaries of their monitored health data.

JUNIPER NETWORKS

Bangalore, India

SOFTWARE ENGINEER

07/2019 - 09/2021

- Engineered and maintained HealthBot's API server, optimizing config management and UI data flow for real-time network analytics.
- Built advanced search components using React.js, Python, and JavaScript, enabling granular filtering and improved user experience.
- Enhanced product features and resolved UI/API issues using Flask, following Agile practices for iterative development.
- Led architecture and development of a cross-platform mobile app using React Native, designing both frontend and backend flows, and implementing API integrations—boosting user engagement through a seamless and intuitive UX.
- Migrated UI framework from Semantic to Material UI, increasing responsiveness by 30% while maintaining backward compatibility.
- Automated containerization and deployment with Docker, reducing production deployment time and manual effort significantly.

Education

MSc Computer Science | Erasmus Mundus Joint Master's Degree

France,UK,Sweden,Italy

University of Lorraine | Leeds Beckett University| Luleå University of Technology

09/2021 - 06/2023

- **Thesis:** Machine learning for clean combustion modeling - identification and prediction of combustion regimes.
- **Specializations:** Cloud Technologies, Data Science, Networking, and System Engineering
- **Scholarship:** Erasmus Mundus Fully Funded scholarship

Technical Skills

Languages & Frameworks

Python, Golang, JavaScript/TypeScript, C++, React, FastAPI, Flask, Django, Node.js, PyTorch

DevOps & Cloud

Docker, Kubernetes, Helm, AWS, Azure, GitLab CI/CD, Jenkins, NETCONF

Databases & Tools

PostgreSQL, MongoDB, Redis, ChromaDB, Firebase, Git, Linux, Shell, Tableau, SQLAlchemy

Others

LLMs, RAG, Hugging face, GANs, Data analysis, Prompt engineering, MLOps, Material UI, Redux

Key Project

Google Cloud AI Hackathon, Winner

Skellefteå, Sweden

Intelligent Roof Load Management

06/2025

- Developed a drone-simulated IoT system utilizing an AI "Soft Sensor" for real-time snow density and load calculation on roofs.
- Built a scalable data pipeline using LavinMQ, InfluxDB, and Grafana for real-time messaging, storage, and visualization.
- **Tech Stack:** Python, Google Cloud Platform (Compute Engine, Docker, VM Instances), LavinMQ, InfluxDB, Grafana, React

Certifications

2023 **Docker & Kubernetes: The Practical Guide**, Academind

Udemy
